Saddle pad is made of felt with foam insert over a breathable mesh for a non-slip fit. Size: 30" x 32"

Design Your Own Non-Slip Pad!

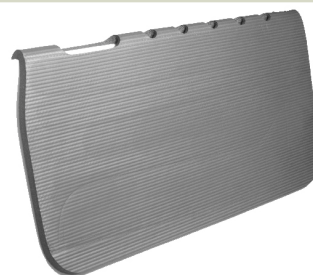

Design Your Own Non-Slip Pad!

We have Eco Friendly foams in many types and thicknesses. We have excellent memory foam and other open cell and closed foams. We have many non-slip materials.

Now, let's design a good performing non-slip pad.

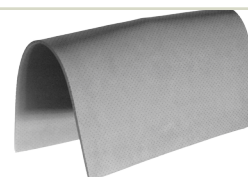

A. Select perforated Eco Friendly foam. This polyolefin foam is naturally anti-bacterial, has good anti-slip properties wet or dry, and will not irritate skin. No neoprene, No PVC, Not EVA.
B. Put a layer of 'high quality' memory foam over layer. ps! You do not want the cheap memo foam that turns into a rock when the weather becomes slightly cooler!
C. Add a durable non-slip surface over top. This keeps the saddle pad in place. Bind together.
See item **SB66298**.

SB66214

● **Western Foam Pad**

PU foam saddle pad conforms to the shape of a horse's back. Colors: Black, Green. Size: Full: 30" x 32"

SB66297

● **Western No Slip Pad**

Special foam that is perforated to improve ventilation as well as flexibility. Size: 24" x 22"
